

**DRAW VICES**

Catalogue No.	Cable Sizes	Weight (kg)
DV5340	4 x 25sqmm	2.6
	4 x 50sqmm	
DV5341	4x 70sqmm	5.24
	4 x 95sqmm	

Draw Vices are required for running out and partly, for pulling the cable towards the pole at line angles.

These tools offer the great advantage that it is possible to clamp the cable without any bolted connection. The grip on the cable increases tension on the draw vice ensuring safe clamping under any load condition.

**VG TW - Vice Grips**

These modified Vice Grips are used in twisting various size Aluminium Sector Cable. The smooth surface of the palms allows twisting of the cable without damaging the conductor.

**INSULATED TOOLS**
